ELSEVIER

Thin Solid Films 307 (1997) 313–317

thin solid films

Subject Index of Volume 307

Adhesion
Effect of sandblasting on adhesion strength of diamond coatings, 21
Effects of carbon incorporation on the structure and mechanical properties of cubic boron nitride films, 152
Adsorption
An orientation analysis of differently endgroup-functionalised alkanethiols adsorbed on Au substrates, 183
Comparison of adsorption characteristics of methyl orange and α-naphthol orange molecules onto the cationic Langmuir–Blodgett films, 274
Alloys
Oxidation of quasicrystalline and crystalline AlCuFe thin films in air, 120
Oxidation study of a polycrystalline Ni/Cr alloy I: room-temperature exposure to O_2, 126
Aluminum
Anti-oxidation properties of TiAlN film prepared by plasma-assisted chemical vapor deposition and roles of Al, 113
Electrodeposited Ni–Al particle composite coatings, 133
Initial development of the lateral hillock distribution in optical quality Al thin films studied in real time, 169
Amorphous materials
A structural approach to gallium phosphate thin solid films, 43
Crystallographic and morphological characterization of reactively sputtered Ta, Ta–N and Ta–N–O thin films, 79
Structural properties of a-$Si_{1-x}N_x$:H films grown by plasma enhanced chemical vapour deposition by $SiH_4 + NH_3 + H_2$ gas mixtures, 298
Anisotropy
Ellipsometric method for investigation of the optical anisotropy of thin films: theory and calculations, 192
FMR properties of epitaxial Fe_3O_4 films on MgO(100), 250
Annealing
Texture in evaporated Ag thin films and its evolution during encapsulation process, 89
Antibody
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Atomic force microscopy
Nucleation and growth of Cu thin films on silicon wafers deposited by radio frequency sputtering, 96
Atomic force microscopy (AFM)
Nucleation of strontium titanate films grown by PLD on silicon: a kinetic model, 306

Boron carbide
Deposition of boron carbide by laser CVD: a comparison with thermodynamic predictions, 29
Boron nitride films
Effects of carbon incorporation on the structure and mechanical properties of cubic boron nitride films, 152

Capacitance
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Carbon
Effects of carbon incorporation on the structure and mechanical properties of cubic boron nitride films, 152
Carboxylic acids
Self-assembled multilayer formation of an aromatic bifunctional molecule via selective ionic interaction, 280
Chemical vapour deposition (CVD)
Deposition of boron carbide by laser CVD: a comparison with thermodynamic predictions, 29
Chromium
Oxidation study of a polycrystalline Ni/Cr alloy I: room-temperature exposure to O_2, 126
C-N films
Characterization of C–N thin films deposited by reactive excimer laser ablation of graphite targets in nitrogen atmosphere, 54
Coatings
Effect of sandblasting on adhesion strength of diamond coatings, 21
Electrodeposited Ni–Al particle composite coatings, 133
Structural and optical properties of PbS thin films obtained by chemical deposition, 240
Copper
Nucleation and growth of Cu thin films on silicon wafers deposited by radio frequency sputtering, 96
Co-P-TiO_2
Electrolytic cŏmposite Co–P–TiO_2 layers as electrode materials for oxygen electroevolution, 233
Critical load
An energy approach to quantification of adhesion strength from critical loads in scratch tests, 156
CVD
Preparation and study of doped and undoped tin dioxide films by the open air chemical vapour deposition technique, 221

Deposition process
Multivariate analysis of noise-corrupted PECVD data, 65
Diamond
Effect of sandblasting on adhesion strength of diamond coatings, 21
Diamond-like carbon
The structure and residual stress in Si containing diamond-like carbon coating, 1
Diffusion barrier
Crystallographic and morphological characterization of reactively sputtered Ta, Ta–N and Ta–N–O thin films, 79
Disorder controlled hopping
Hole transport in poly(styrene) doped with *p*-diarylaminostilbene molecules, 215
Docosonic acid
Surface dilational behavior of docosanic acid monolayers spread on the surface of drops of polymer solutions, 100

Elsevier Science S.A.

Elastic deformation energy
An energy approach to quantification of adhesion strength from critical loads in scratch tests, 156
Electrolyte composite layers
Electrolytic cŏmposite Co–P–TiO_2 layers as electrode materials for oxygen electroevolution, 233
Ellipsometry
Correlation between microstructure and the optical properties of TiO_2 thin films prepared on different substrates, 38
Ellipsometric method for investigation of the optical anisotropy of thin films: theory and calculations, 192
Self-assembled multilayer formation of an aromatic bifunctional molecule via selective ionic interaction, 280
ESR
Sol–gel prepared In_2O_3 thin films, 288
Evaporation
Texture in evaporated Ag thin films and its evolution during encapsulation process, 89

Films
Ultrathin layers of rare earth oxides from Langmuir–Blodgett films, 260
FITC marked rabbit immunoglobulin
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Fluorescence
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Fourier Transform Infrared Spectroscopy (FTIR)
A structural approach to gallium phosphate thin solid films, 43
Fourier transform infrared spectroscopy (FTIR)
Comparison of adsorption characteristics of methyl orange and α-naphthol orange molecules onto the cationic Langmuir–Blodgett films, 274
Friction coefficient
Shear strength measurements of parallel MoS_x thin films, 163
FTIR spectroscopy
Molecular orientation in mixed LB films containing photochromic molecules, 266
Fused-quartz
C—The synthesis of $CeO_{2+n} \cdot n\ H_2O$ nanolayers on silicon and fused-quartz surfaces by the successive ionic layer deposition technique, 60

Galvanostatic
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Gas-sensor
Characterization of a molybdenum oxide sputtered thin film as a gas sensor, 148
Germane
A kinetic model for photochemical vapor deposition from germane and silane, 71
Gold
An orientation analysis of differently endgroup-functionalised alkanethiols adsorbed on Au substrates, 183
Effects of polymer substrate surface energy on nucleation and growth of evaporated gold films, 110
Growth mechanism
Effects of polymer substrate surface energy on nucleation and growth of evaporated gold films, 110
Electrodeposited Ni–Al particle composite coatings, 133
Nucleation of strontium titanate films grown by PLD on silicon: a kinetic model, 306

Heat treatment
Initial development of the lateral hillock distribution in optical quality Al thin films studied in real time, 169
Structural and electroluminescent characteristics of sputtered SrS:Ce thin films by rapid thermal process, 228
Heterostructures
Transmission electron microscopy study of Si δ-doped GaAs/AlGaAs/InGaAs/GaAs pseudomorphic high electron mobility transistor structures, 6
Hole transport
Hole transport in poly(styrene) doped with *p*-diarylaminostilbene molecules, 215
Human and bovine albumins
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Hydrocarbons
Multivariate analysis of noise-corrupted PECVD data, 65

Indium oxide
Sol–gel prepared In_2O_3 thin films, 288
Indium tin oxide
Preparation and properties of indium tin oxide films deposited on polyester substrates by reactive evaporation, 200
Interfaces
Transmission electron microscopy study of Si δ-doped GaAs/AlGaAs/InGaAs/GaAs pseudomorphic high electron mobility transistor structures, 6
Ion implantation
A model of oxide layer growth on Ag^+ and Pt^+ ion implanted nickel anode in aqueous alkaline solution, 106
Iron oxide
FMR properties of epitaxial Fe_3O_4 films on MgO(100), 250

Kinetic model
A kinetic model for photochemical vapor deposition from germane and silane, 71

Langmuir–Blodgett (LB) films
Ultrathin layers of rare earth oxides from Langmuir–Blodgett films, 260
Molecular orientation in mixed LB films containing photochromic molecules, 266
Comparison of adsorption characteristics of methyl orange and α-naphthol orange molecules onto the cationic Langmuir–Blodgett films, 274
Self-assembled multilayer formation of an aromatic bifunctional molecule via selective ionic interaction, 280
Laser ablation
Nucleation of strontium titanate films grown by PLD on silicon: a kinetic model, 306
Preparation and characterization of ZnO:Al films by pulsed laser deposition, 50
Laser irradiation
Deposition of boron carbide by laser CVD: a comparison with thermodynamic predictions, 29
LB lipid monolayers
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Lead
Structural and optical properties of PbS thin films obtained by chemical deposition, 240
Light absorption
Light absorption in the near-infrared and photocurrent synergism observed with vacuum-sublimed films of zinctetraphenylporphyrin, 208
Light scattering
Initial development of the lateral hillock distribution in optical quality Al thin films studied in real time, 169

Magnetic properties and measurements
Anisotropic optical, magnetic, and electrical properties of obliquely evaporated Ni films, 245
FMR properties of epitaxial Fe_3O_4 films on MgO(100), 250
Metallization
Texture in evaporated Ag thin films and its evolution during encapsulation process, 89
Molecular beam epitaxy (MBE)
Photovoltaic properties of indium selenide thin films prepared by van der Waals epitaxy, 283
Molybdenum
Characterization of a molybdenum oxide sputtered thin film as a gas sensor, 148
MoS_2
Shear strength measurements of parallel MoS_x thin films, 163
Multilayers
Self-assembled multilayer formation of an aromatic bifunctional molecule via selective ionic interaction, 280

Nanolayers
C—The synthesis of $CeO_{2+n} \cdot n\ H_2O$ nanolayers on silicon and fused-quartz surfaces by the successive ionic layer deposition technique, 60
Near-infrared
Light absorption in the near-infrared and photocurrent synergism observed with vacuum-sublimed films of zinctetraphenylporphyrin, 208
Nickel
A model of oxide layer growth on Ag^+ and Pt^+ ion implanted nickel anode in aqueous alkaline solution, 106
Anisotropic optical, magnetic, and electrical properties of obliquely evaporated Ni films, 245
Electrodeposited Ni–Al particle composite coatings, 133
Oxidation study of a polycrystalline Ni/Cr alloy I: room-temperature exposure to O_2, 126
Niobium
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Nitrogen atmosphere
Characterization of C–N thin films deposited by reactive excimer laser ablation of graphite targets in nitrogen atmosphere, 54
Nucleation
Effects of polymer substrate surface energy on nucleation and growth of evaporated gold films, 110
Nucleation and growth of Cu thin films on silicon wafers deposited by radio frequency sputtering, 96
Nucleation of strontium titanate films grown by PLD on silicon: a kinetic model, 306

Optical coatings
Correlation between microstructure and the optical properties of TiO_2 thin films prepared on different substrates, 38
Initial development of the lateral hillock distribution in optical quality Al thin films studied in real time, 169
Oxidation of quasicrystalline and crystalline AlCuFe thin films in air, 120
Optical properties
Anisotropic optical, magnetic, and electrical properties of obliquely evaporated Ni films, 245
Ellipsometric method for investigation of the optical anisotropy of thin films: theory and calculations, 192
Investigation of the plasma polymer deposited from pyrrole, 14
Molecular orientation in mixed LB films containing photochromic molecules, 266
Structural and optical properties of PbS thin films obtained by chemical deposition, 240
Structural and electroluminescent characteristics of sputtered SrS:Ce thin films by rapid thermal process, 228
Optical spectroscopy
Molecular orientation in mixed LB films containing photochromic molecules, 266
Organometallic vapour deposition
A structural approach to gallium phosphate thin solid films, 43
Oxidation
Anti-oxidation properties of TiAlN film prepared by plasma-assisted chemical vapor deposition and roles of Al, 113
Oxidation of quasicrystalline and crystalline AlCuFe thin films in air, 120
Oxidation study of a polycrystalline Ni/Cr alloy I: room-temperature exposure to O_2, 126
Oxide growth
A model of oxide layer growth on Ag^+ and Pt^+ ion implanted nickel anode in aqueous alkaline solution, 106
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Oxides
Ultrathin layers of rare earth oxides from Langmuir–Blodgett films, 260
Oxygen electroevolution
Electrolytic cŏmposite Co–P–TiO_2 layers as electrode materials for oxygen electroevolution, 233

Photochemical vapor deposition
A kinetic model for photochemical vapor deposition from germane and silane, 71
Photocurrents
Light absorption in the near-infrared and photocurrent synergism observed with vacuum-sublimed films of zinctetraphenylporphyrin, 208
Photoelectron spectroscopy (PES)
Photovoltaic properties of indium selenide thin films prepared by van der Waals epitaxy, 283
Photovoltage
Photovoltaic properties of indium selenide thin films prepared by van der Waals epitaxy, 283
Plasma processing and deposition
Investigation of the plasma polymer deposited from pyrrole, 14
Multivariate analysis of noise-corrupted PECVD data, 65
Polarization
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Polycrystalline structure
Characterization of C–N thin films deposited by reactive excimer laser ablation of graphite targets in nitrogen atmosphere, 54
Polyester substrate
Preparation and properties of indium tin oxide films deposited on polyester substrates by reactive evaporation, 200
Polymers
Effects of polymer substrate surface energy on nucleation and growth of evaporated gold films, 110
Investigation of the plasma polymer deposited from pyrrole, 14
Polymer solutions
Surface dilational behavior of docosanic acid monolayers spread on the surface of drops of polymer solutions, 100
Potential
Formation and dissolution behaviour of niobium oxide in phosphoric acid solutions, 141
Preferred orientation
X-ray stress measurement for TiN films evaporated by PVD, 178
Pulsed laser deposition
Preparation and characterization of ZnO:Al films by pulsed laser deposition, 50
PVD
Crystallographic and morphological characterization of reactively sputtered Ta, Ta–N and Ta–N–O thin films, 79

Radio frequency sputtering
Nucleation and growth of Cu thin films on silicon wafers deposited by radio frequency sputtering, 96
RBS
A model of oxide layer growth on Ag^+ and Pt^+ ion implanted nickel anode in aqueous alkaline solution, 106
Reactive evaporation
Preparation and properties of indium tin oxide films deposited on polyester substrates by reactive evaporation, 200
Residual stress
The structure and residual stress in Si containing diamond-like carbon coating, 1
X-ray stress measurement for TiN films evaporated by PVD, 178
Resistivity
Anisotropic optical, magnetic, and electrical properties of obliquely evaporated Ni films, 245
Rheology monolayers
Surface dilational behavior of docosanic acid monolayers spread on the surface of drops of polymer solutions, 100
Rutherford backscattering spectroscopy
Investigation of the plasma polymer deposited from pyrrole, 14

Scratch test
An energy approach to quantification of adhesion strength from critical loads in scratch tests, 156
Selenides
Photovoltaic properties of indium selenide thin films prepared by van der Waals epitaxy, 283
Semiconductors
Structural properties of a-$Si_{1-x}N_x$:H films grown by plasma enhanced chemical vapour deposition by $SiH_4 + NH_3 + H_2$ gas mixtures, 298
Transmission electron microscopy study of Si δ-doped GaAs/AlGaAs/InGaAs/GaAs pseudomorphic high electron mobility transistor structures, 6
Sensor
Sol–gel prepared In_2O_3 thin films, 288
Shear stress
Shear strength measurements of parallel MoS_x thin films, 163
Silane
A kinetic model for photochemical vapor deposition from germane and silane, 71
Silicon
The structure and residual stress in Si containing diamond-like carbon coating, 1
Silicon nitride
Structural properties of a-$Si_{1-x}N_x$:H films grown by plasma enhanced chemical vapour deposition by $SiH_4 + NH_3 + H_2$ gas mixtures, 298
Silver
Texture in evaporated Ag thin films and its evolution during encapsulation process, 89
SnO_2 thin films
Preparation and study of doped and undoped tin dioxide films by the open air chemical vapour deposition technique, 221
Specific and non-specific antigens
The study of the antigen–antibody reaction by fluorescence method in LB films for immunosensor, 294
Sputtering
Characterization of a molybdenum oxide sputtered thin film as a gas sensor, 148
Structural and electroluminescent characteristics of sputtered SrS:Ce thin films by rapid thermal process, 228
Stilbenes
Hole transport in poly(styrene) doped with *p*-diarylaminostilbene molecules, 215
Structural properties
Structural and optical properties of PbS thin films obtained by chemical deposition, 240
Structural properties of a-$Si_{1-x}N_x$:H films grown by plasma enhanced chemical vapour deposition by $SiH_4 + NH_3 + H_2$ gas mixtures, 298
Structure
The structure and residual stress in Si containing diamond-like carbon coating, 1
Successive ionic-layer deposition and silicon
C—The synthesis of $CeO_{2+n} \cdot n\ H_2O$ nanolayers on silicon and fused-quartz surfaces by the successive ionic layer deposition technique, 60
Sulphides
Structural and electroluminescent characteristics of sputtered SrS:Ce thin films by rapid thermal process, 228
Surface and interface states
FMR properties of epitaxial Fe_3O_4 films on MgO(100), 250
Surface morphology
Effect of sandblasting on adhesion strength of diamond coatings, 21
Nucleation of strontium titanate films grown by PLD on silicon: a kinetic model, 306
Surface segregation
Anti-oxidation properties of TiAlN film prepared by plasma-assisted chemical vapor deposition and roles of Al, 113

Tantalum
Crystallographic and morphological characterization of reactively sputtered Ta, Ta–N and Ta–N–O thin films, 79
TEM
Correlation between microstructure and the optical properties of TiO_2 thin films prepared on different substrates, 38
Thin film
Characterization of a molybdenum oxide sputtered thin film as a gas sensor, 148
Nucleation and growth of Cu thin films on silicon wafers deposited by radio frequency sputtering, 96
Shear strength measurements of parallel MoS_x thin films, 163
X-ray stress measurement for TiN films evaporated by PVD, 178
Titanium nitride
Anti-oxidation properties of TiAlN film prepared by plasma-assisted chemical vapor deposition and roles of Al, 113
X-ray stress measurement for TiN films evaporated by PVD, 178
Titanium oxide
Correlation between microstructure and the optical properties of TiO_2 thin films prepared on different substrates, 38
Transmission electron microscopy
Transmission electron microscopy study of Si δ-doped GaAs/AlGaAs/InGaAs/GaAs pseudomorphic high electron mobility transistor structures, 6
Transparent conducting oxide
Preparation and study of doped and undoped tin dioxide films by the open air chemical vapour deposition technique, 221

Ultrathin
Ultrathin layers of rare earth oxides from Langmuir–Blodgett films, 260

Work of adhesion
An energy approach to quantification of adhesion strength from critical loads in scratch tests, 156

XPS
Sol–gel prepared In_2O_3 thin films, 288
X-ray photoelectron spectroscopy (XPS)
An orientation analysis of differently endgroup-functionalised alkanethiols adsorbed on Au substrates, 183

X-ray diffraction
A structural approach to gallium phosphate thin solid films, 43
Comparison of adsorption characteristics of methyl orange and α-naphthol orange molecules onto the cationic Langmuir–Blodgett films, 274
Deposition of boron carbide by laser CVD: a comparison with thermodynamic predictions, 29
Texture in evaporated Ag thin films and its evolution during encapsulation process, 89
X-ray stress measurement for TiN films evaporated by PVD, 178
Zinc oxide
Preparation and characterization of ZnO:Al films by pulsed laser deposition, 50
Zinctetraphenyl porphyrin
Light absorption in the near-infrared and photocurrent synergism observed with vacuum-sublimed films of zinctetraphenylporphyrin, 208
